However, there is one unpleasant factor that influence bad when we use our time.

Writing

Time is ^{that} a significant thing that plays a big role in people's lives. According to Charles Dickens, "Procrastination is the thief of time, collar him". I think that author names procrastination a thief of time because people are always being distracted from important activities with it. And "collar him" means that we should plan our time and not to spend it on useless activities.

Personally, I fully agree with the Charles Dickens' point of view because know many examples supported it. For example, teenagers spend ^{a large quantity of} their time in social networks instead of learning school subject or doing sports. Also, using mobile phones is bad to your eyes and it we could have health problems following this way. Moreover, I can support an author because know a literature character who spend all time lying on the sofa. At the end of the book Oblomov didn't achieved anything and due to this procrastination he didn't have a good life.

14 In conclusion, I can say that people should use time management to avoid procrastination problems. It will make their lives better and they will be happy of their career.
