Writing

My favourite computer game that I play very often is "The Sims 4". There aren't any characters at the beginning of the game, you should create them yourself, there isn't any plot, you can start from a very beginning, you create the plot yourself. You can build a house and decorate it, but you need some money for this, so our character should find the job first and build a career. The game takes place in an imaginary cities, you can choose the city to play, they are all very sunny and beautiful. I like "The Sims 4" because it develops design skills. Also in this game you can coolly interact with nature and people around, let's say you send someone to sleep or walk with a dog. But most of all I like to build different houses and choose the area where the house will be.
